EDUCATION

MLR Institute of Technology

B.Tech in Computer Science and Engineering (Artificial Intelligence and Machine Learning)
CGPA : 8.49

Nov 2021 – May 2025

Hyderabad, India

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, SQL, C

Web Development: React.js, Flask, REST APIs, Tailwind CSS

Databases: PostgreSQL, MySQL

Tools: Jira, Postman, GitHub

Core Concepts: Data Structures & Algorithms, Database Management, OOPS

PROFESSIONAL EXPERIENCE

AITESTA Private Limited

July 2025 – Mar 2026

Software Engineer

Hyderabad

- Developed a scalable **front-end interface** for a performance testing application skin over **Apache JMeter** using **React.js** and **Tailwind CSS**, enhancing usability by **50%**.
- Integrated the UI with a **Flask-based backend**, ensuring smooth data flow and reducing latency by **40%** during real-time test visualization.
- Consumed **RESTful APIs** and managed asynchronous data flow between front-end and back-end services, improving application responsiveness by **30%**.
- Improved monitoring efficiency by creating an **intuitive dashboard** that reduced data lookup times by **30%**.

AITESTA Private Limited

Mar 2025 – Jun 2025

Software Engineer Intern

Hyderabad

- Automated end-to-end test cases using the **iTester tool**, increasing test coverage and reducing manual testing efforts by **65%**.
- Designed and maintained reusable test scripts, enabling faster regression cycles and improving test reliability by **40%**.
- Collaborated directly with **clients** to gather requirements, provide testing updates, and ensure delivery aligned with business goals, enhancing stakeholder satisfaction.
- Identified and resolved automation bottlenecks by analyzing test failures and improving locator strategies, boosting script stability by **30%**.

PROJECTS

DocAssist – Your Medical Assist | HTML, CSS, JavaScript, Python

- Built a **Generative AI medical chatbot** using LangChain, OpenAI API, Hugging Face, and Gradio, enabling **real-time query resolution with 90% response accuracy**.
- Designed and integrated a **user-friendly front end** with HTML, CSS, and JavaScript, increasing user engagement by **40%**.
- Optimized performance and deployment flow, resulting in a **30% reduction in response latency** during live chatbot interactions.

Personalized Book Recommender | Python, Streamlit

- Developed a **machine learning-based book recommendation system** using **cosine similarity** and **Kaggle user-rating datasets**, achieving **85%+ recommendation relevance**.
- Deployed an interactive **Streamlit web app**, enabling **real-time personalized book suggestions** with an intuitive user interface.
- Optimized data flow and algorithm performance, reducing recommendation generation time by **40%**.

ACHIEVEMENTS

Recognized in the Top Coders category in Open Coding Round **Code Gladiators 2024**.

Earned the **LeetCode 75 badge** for consistent problem-solving proficiency.
